ABOUT MAPLELEAF CABINETS

Mapleleaf Cabinets is a commercial millwork shop certified for its high-quality work through the Architectural Woodwork Institute. Specializing in commercial cabinetry and fixtures, the company designs, engineers, builds and ships fixtures all across the globe.

Codale Electric Supply, premium Wattsmart Business vendor

PROJECT DESCRIPTION

Working with Rocky Mountain Power's Wattsmart Business Program and Codale Electric Supply, Mapleleaf Cabinets received energy-efficient upgrades to their lighting system, which will save an estimated \$7,900 in annual energy costs.

Codale Electric Supply provided an initial assessment and lighting options. Ultimately, Mapleleaf Cabinets' decision to move forward with the project was thanks to Codale Electric Supply's ability to identify the best lighting and the right layout, and to provide a clear savings analysis.

Lighting Project Before & After

ACTION TAKEN

Codale Electric Supply prepared the project's proposal and incentive paperwork, so that everything was readily available for Mapleleaf Cabinets' approval. Incentives from Rocky Mountain Power reduced the total project cost by more than half, from \$51,770 to \$23,745. This investment is estimated to pay for itself in three years.

While Mapleleaf Cabinets is excited to see the financial benefits over time, employees at the millwork company already enjoy increased visibility and improved lighting. For a company where attention to detail is critical, the new lighting adds value for production and lifts employee morale.

"The best aspect of working with the program was how little effort it took on our part. The ease of getting this project off the ground allowed us to realize the benefits immediately."

– Emmett Gibson, director of operations, Mapleleaf Cabinets
